

Observance of National Space Day

Salbari College, Baksa

Venue: Smart Classroom

23/08/2024, Friday

The maiden National Space Day was organized at Salbari College on 23rd of August, 2024 to celebrate India's remarkable success with the Chandrayaan-2 mission last year. The event commenced at 10:30 AM with an inaugural lecture by honourable Principal Dr. Jagat Chandra Basumatary, who spoke briefly about the significance of this day in India's space journey. Following this, Dr. Pritam Das delivered an insightful talk titled "*Indian Space Odyssey: From Bicycle to Gaganyaan*," highlighting India's advancements in space technology, from humble beginnings to ambitious projects like Gaganyaan. The program attracted around 120 students and faculty members from all the departments who actively participated in the discussion. Furthermore, the talk was live-streamed via Google Meet to Bhawanipur Anchalik College, allowing students from both institutions to benefit from Dr. Das's expertise and experience. His presentation enriched the students' understanding of India's space missions and the future potential of the country's space program. The event concluded with Mr. Mantu Baro, who captivated the audience with interesting and popular facts about the day. This celebration not only honored India's space achievements but also inspired students to take interest in the country's expanding horizons in space exploration.
